

Win on Wealth Introduction

A Billionaire's Humanitarian Project:

To help people of average means create wealth

by Taansen Fairmont, Founder, Brilliance in Commerce

A close friend has sponsored me in a dynamite company called Win on Wealth (WOW), based in Los Angeles. Some readers are already in on this, as I've heard favorable things about it from several people.

It only costs about \$500 to get started - - \$499 for the corporation setup and loan application. That's all anyone ever has to pay out of pocket.

WOW loans six and seven figures to members to be invested in the bank instruments trading platforms, and pays referral commissions 18 levels deep. They call it a home ownership program. I've done the due diligence on it and so have several other associates. No dirt and no negatives. Listed with the BBB; no complaints.

You may or may not realize that what I just said above is rather astounding and revolutionary. I can't tell you how many people over the years have asked me if they could borrow the millions needed to get into a zero-risk BIIP PPP. It has just never been made available anywhere, to our knowledge, until now. And further, to have such a rich commission plan combined with it is absolutely unheard of.

Back in 2021, the owners had \$5 billion plus coming in per month, and the platform was going to stop giving them these profits in 2021, if they didn't come up with additional humanitarian projects to justify it. That is typical in the BIIP industry. So, they came up with this plan. They finally got it organized and started in early 2022. Thus their focus is to promote humanitarian efforts through upgrading human welfare and enabling entrepreneurs and business owners an easier way to obtain startup capital.

By May and early June, they had over 5,000 applications coming in. It is over 8,000 by now. They got overwhelmed. They put a halt on all new registrations. They took down the YouTube and Zoom videos. We are very lucky to still have the ones above on Dropbox and Screencast.

So now they're scrambling to hire and train an army of processors, so as to be able to handle the volume. It could easily get to 50,000 and 500,000 members within the next year.

The owners also own an insurance company as well as an investment company and various other enterprises. They give members a C corporation and then loan funds to the member's corporation out of their own funds. They start the member out with a "baby loan" of \$100K. The debt service is \$2K a month, and they pay the member \$6K a month. Deduct the \$2K and the net positive cash flow is \$4K a month.

Then as soon as the member has referred ten other new members who get approved, they qualify for the "Daddy Loan", which is \$1.5 million. The debt service on that is \$15K a month, and they pay \$30K a month, so the net positive cash flow is \$15K a month. Plus the member has \$1 million with which to buy a home free and clear; or invest it back into the bank instruments platform. They have a very robust compensation plan for referrals, which can make the member a multimillionaire within the first year.

Yes, we already addressed the devil's advocate question of "what if they don't pay the loans?" The answer is that the member is off the hook, according to the contract itself - - because the loans come from the company itself - - not from any outside source. First of all, the individual has no liability; and secondly, even the member's corporation will be held harmless according to the contract. Finally, default is

extremely unlikely, because the whole purpose of the company setting up this system is to provide a channel for their extra billions and to fulfill their humanitarian projects requirement by helping society and stimulating the economy.

See complete notes, graphs, and details here:

https://www.dropbox.com/s/w8jeup7ewwwc0ak/win%20on%20wealth%20updated%20presentation%20June%202nd%202022.pdf?dl=0&fbclid=IwAR2avz0RMu2oQ7RMD_fqbU4DeiiKSlqDESazwcYoG8zNFo6Pt_DA50C9OQE

Of course the corporation will have to file its tax returns, but the majority of its income can be transferred to a private contract trust, thus minimizing what the corporation owes. The world's most state-of-the-art private contract trust is the House of Freedom International Natural Law Trust from Brilliance in Commerce.

FAQs

This looks too good to be true. Why are they just giving money away?

The appearance of “too good to be true” is because the BIIP industry (via the PPPs - - Private Placement Platforms) is private. It is not open to the public, so most people don't know about it. If you wish to see how those kinds of high returns are generated for billion dollar investors in PPPs, you can read my Industry Overview at <https://bic-3.s3-us-west-1.amazonaws.com/BIIPIndustryOverview.pdf>.

The WOW program may also appear unrealistic if one doesn't understand that the company is also making money on the program. They're not “giving away” the money. They are loaning money to member corporations, but they are also investing the majority of it in their BIIP, which generates enough profits both for the members and for the company.

Can people outside the United States join?

One can live anywhere in the world, but one must have a US address and qualify for a US corporation. To qualify, the individual would need to have a US Social Security Number (SSN) or International Tax Identification Number (ITIN). However, it may be possible to partner with someone within the US in order to participate in the starter loan program for now.

References about the ITIN: <https://www.irs.gov/pub/irs-pdf/fw7.pdf>

<https://klasing-associates.com/know-u-s-entity-formation-non-resident-aliens-business-united-states>

Can I use my existing corporation or LLC?

WOW has mentioned that if you want to use an existing corporation then WOW needs the corporation to be clean so that they can manage the accounting activities generated from WOW and they do not want

income mixed with any other accounting activities. If it has been used for anything else in the past, I would suggest that you allow WOW to build a completely new corporation for you.

How long does it take to finally get funded?

Originally the company said it's about a 60-90 day process, but that may be subject to change.

What about the personal guarantee issue? Will I be held personally liable for paying back the loan(s)?

WOW will give 2 options on how you would like to accept responsibility for the loans. According to a source that has already been approved for funding, they said that they received a document that is part of the contract (which we will all get before the funding) that says if I take the full 100K line I am personally responsible for the loan and for making the payments. If I accept the split of 30K to me/30K to the bank/40K for rewards or interest-bearing account, then they (the bank) will be responsible for the payback of the loan. So, you can get all of the 100K if you want to do as you wish. However, you will then be liable for the repayment of the line of credit of 100K.

What if I refer others later and the price increase is too much? Would it be worth still going forward to apply for this loan?

The one-time membership fee (whether it be \$500 or \$3000) still does not outweigh the benefits of the loans offered. Let's say worst case scenario, the membership fee is now \$2000. With the starter loan you will be funded a lump sum of \$30K, thereafter \$40K is placed in a high yield interest bearing account. The bank will share 15% of that interest which pays out \$6K. \$2K is set aside to help pay off your loan. That leaves you to receive \$4K monthly generated from the bank's interest-bearing account. If you chose to check the box to be personally liable for the loan, then you are eligible to submit as much money as you like into the interest-bearing account. (for example: $30k \times 15\% = \$6000 - \$2000 = \$4000$ per month). But instead, if you decide to place the lump sum of \$30K given to you into the interest-bearing account will equal $70K \times 15\% =$ generating \$8,500 per month. So please do the math: A one-time fee of \$2000 compared to a monthly payment of between \$4000 - \$8500 PER MONTH. Which would you rather have?

How to Register

It only costs about \$500 to get started - - \$499 for the corporation setup and loan application. That's all anyone ever has to pay out of pocket.

For new member registration, right now we are advised to NOT USE THE FORMS ON THE COMPANY WEBSITE - - because they have already become obsolete, and the company is experiencing such growing pains that they haven't completed the update of the website yet.

Every member gets a referrer-encoded URL to give to prospective new members. However, at this point I am advised NOT to give that out until the company has had time to revise the website.

Instead, our sponsors know certain individual officers within the company and gave us a special 17-page application form to use, with instruction to address it personally to those specific officers. That way, they said our applications will get accelerated attention, while the company is working round the clock to get their intake infrastructure upgraded and scaled up to handle the volume efficiently.

Follow These Steps Exactly and Completely – Then Doublecheck to Make Sure

Step 1: Open and download the fillable PDF WOW 17-page Registration Form at this link:

https://bic-4.s3.us-west-1.amazonaws.com/WOW_RegForm-SponsorTFS.pdf

Step 2: BEFORE FILLING IT OUT, also open this version:

https://bic-4.s3.us-west-1.amazonaws.com/WOW_RegForm-EXAMPLE FILLED OUT PROPERLY.pdf

This second version has a fictitious entity “John Doe” filled in to show you how to fill out the Step 1 version properly. Refer to it line by line so you can fill out the first one correctly.

It is best to fill out the first version in Step 1 on your computer in Adobe Acrobat. Type in your answers. Then Save As the same document with a new file name with your initials in it. If that isn't possible for you for some reason, then print it out and fill it in by hand.

Note: The “FILLED OUT PROPERLY” version has an anomaly on page 15. It shows information filled in both the left and right columns. *Ignore that. Just fill in your info where available in the left column. Don't fill in anything in the right column on page 15.*

Step 3: When complete, if you typed in your info in Acrobat on your computer, and saved it, now print it out. Or, if you have a DocuSign account and wish to sign using that, do that first before printing it out. If you had already printed it out and filled it in by hand, go to Step 4.

Step 4: Refer to the “John Doe” version linked in Step 2 once again, and see where you need to add certain things by hand, such as your name at the top of page 1. Go through each page and see where you need to sign, and sign in blue ink. If you had PDF editing software and knew how to insert your passport or driver's license and SS card (front and back) on page 4 within the computer, and your bank statement and utility bill on page 5, then those pages are already done. If not, then print out

scans of those documents and tape or paste them into the sections indicated on pages 4 and 5, as shown in the “John Doe” version.

Step 4: On page 11, IGNORE the instructions at the bottom about the money orders. Instead, use these instructions. If you prefer to get money orders, that’s fine, but personal checks or your business checks personally signed are accepted. Make one for \$200.00 payable to WIN ON WEALTH, and one for \$299.00 payable to BETTER BUSINESS BUILDER.

Step 5: If it is convenient, scan all 17 pages of your registration form with your signatures and items added by hand (and taped or pasted on) back into the computer and save it as a PDF file. Save it for your records. If that is not convenient, then at least make a paper copy to keep for yourself in your paper files.

Step 6: Lay both of your signed checks or money orders on a copy machine and make three (3) copies. You now have three 8.5X11 pages of copies of the two checks or money orders.

Step 7: Your completed original application will be divided into two separate stacks:
STACK ONE will have the following pages in this order: Two of the 8.5X11 copies of the two checks, and pages 17, 2, 4, 7, 8, 9, 10. Staple all these pages together in this exact order. Now staple (or paper clip) the two original signed checks to the top of the first 8.5X11 copy of the checks.
STACK TWO will have the following pages in this order: page 1, 3, 5, 6, 11, 12, 13, 14, 15, 16, one 8.5X11 copy of the two checks. Staple these pages together.

If these steps seem like a lot of trouble, remember that the company is being deluged with thousands of applications, and the automation online isn’t updated yet. The better you can follow these instructions, the more likely it is your application will be processed quickly and efficiently with no delays. **Doublecheck** all these steps before you finish, to make sure you completed them.

Then hopefully soon the company’s new online registration will be up and running well for your referrals. WOW hopes to be caught up with processing loans and upgrading their intake system sometime soon. Meanwhile you are very fortunate to be able to use this workaround registration method.

Step 8: Send Express Mail or at least Priority Mail. Write on envelope:
Attention: Anna Reyes / Jodi Pleitez / Meghan Rizzo
15131 Woodlawn Ave.

Tustin CA 92780

If you have questions, write to Taansen Fairmont at:

taansen@brillianceincommerce.com - - or - - gandharva@protonmail.com

After you have registered successfully, then when the company is caught up on its backlog, it is expected that you will receive a welcome email from WOW. If their online registration system upgrade has been completed, then in that welcome email you will receive a personal recruiter/sponsor code and replicated website URL so that you can invite others into your personal downline. If the new online system is ready, then the recruiter/sponsor code is what you must send out to those whom you refer to the program.
